

SQL case Statements Exercise 3

Table 1

```
SELECT Product-ID, Product-name, Price
Case
  When Price > 1000 Then 'Expensive'
  When Price Between 100 And 1000 Then 'Mid-range'
  When Price < 100 Then 'Budget'
End As Price-Category
FROM Products;
```

Table 2

```
SELECT Customer-name, amount
Case
  When order > 1000 Then 'High Value'
  When order Between 500-999.99 Then 'Medium Value'
  When order < 500 Then 'Low Value'
End As Order-Value-Category
FROM Products Orders;
```

Table 3

```
SELECT Employee-name, Department, Salary
Case
  When = depar
  When department = 'IT' and Salary > 80000 Then 'Sr'
  When department = 'HR' and Salary > 55000 Then 'Experienced'
  (optional) Else 'Other Staff'
End as Position level
From Employees;
```

Table 4

```
SELECT Student.name, Score, Student.ID.  
Case  
  WHEN >90 Then 'A'  
  When grade Between 80-89 Then 'B'  
  When grade Between 70-79 Then 'C'  
  When grade Between 60-69 Then 'D'  
  When grade < 60 Then 'F'  
End as Grade  
From Students.
```

Table 5

```
SELECT Delivery.ID, Delivery-Time-minutes.  
Case  
  When performance < 30 mins Then 'Fast'  
  When performance Between 31-60 min Then 'OnTime'  
  When performance = 60 min Then 'Late'  
End as Performance  
From Deliveries.
```

Table 6

```
SELECT Ticket-ID, issue.type, Priority.  
Case  
  When priority = 3 Then 'High'  
  When priority = 2 Then 'Medium'  
  When priority = 1 Then 'Low'  
End as Priority label  
From Tickets.
```
